Respected Recruiting Manager,

I take this opportunity to apply for the job opening in your company for the post of IT Engineer, the advertisement which appeared in the Times OF India dated 2 September 2019. I am currently pursuing bachelor's degree from Mumbai University and I would like to offer my services for this position. I believe that my technical skills, experience, sincerity and ability to work hard makes me a strong candidate for this position.

I have an immense passion for learning new technologies. I have a good understanding of full lifecycle of software development. In addition to the knowledge I have obtained from my education, my experience as a web developer in an internship provided by our college provided me with an excellent background in the practical aspects of software engineering. Moreover, In my second year our team was selected for Smart India Hackathon 2019 where I received first-hand experience in organization, teamwork, responsibility and time-management. I possess good organization abilities and commitment towards my work and responsibility. I would be highly obliged to you if you would consider me for the aforesaid job position. I am sure that you are looking for a qualified software engineer like me to fill the position. I have attached my resume herewith which will give you a detailed insight about my qualifications and skills in detail.

I would like to meet you with the intention of discussing my skills and qualification in detail. I am very excited to learn more about this opportunity and share how I will be a great fit for your organization. If you require any additional material or information, I would be happy to supply it. I will be available for interview at your own convenience.

Thank you in anticipation for considering my application.

Yours Sincerely
